

World leader in vehicle  
de-pollution technology

## SEDA TruckStation ED-G

A-51072-EDG

The system meets all the  
requirements of truck recycling

### Your benefits:

- No vehicle lifting necessary
- Clean removal of liquids
- Complete emptying of fuel tank
- All connections are pre-installed
- Explosion protection through ATEX tank drilling device

### Truck Depollution system

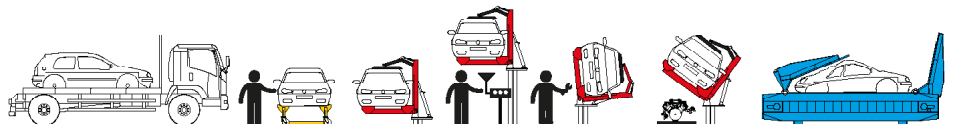

Dismantling of trucks, buses or other heavy vehicles are increasingly important for recyclers worldwide. Working with them, SEDA has developed a depollution solution.

Old trucks, buses and other heavy vehicles have different requirements than car recycling. This solution enables you to remove diesel, used oil and other fluids effectively without the use of a lifting platform. The SEDA drilling device has been specially adapted to remove fuels from commercial vehicles cleanly and efficiently.

Mobile and easy to clean collecting trays with a 110 litre capacity, can catch transmission, engine oil and cooling fluid smoothly. High performance pumps are used for removing the liquids, which are filtered and pumped into their respective storage tanks.

Leading Company  
of Austria

World leader in vehicle  
de-pollution technology

## SEDA TruckStation ED-G

A-51072-EDG

Simple tank connection for fuel  
removal

Mobile collecting trays for  
waste oil & coolant fluid

Easy operation without lift

Leading Company  
of Austria

### Truck Depollution system

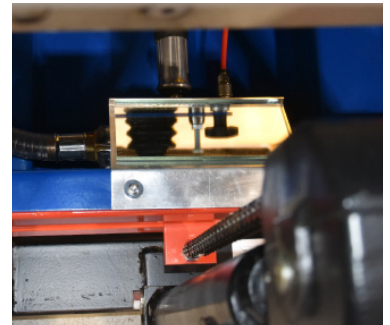

The collecting trays and special drilling device work efficiently, without the need of the vehicle to be raised. The fuel drilling will leave the fuel tank completely empty, as compared to emptying the tank through the filler neck.

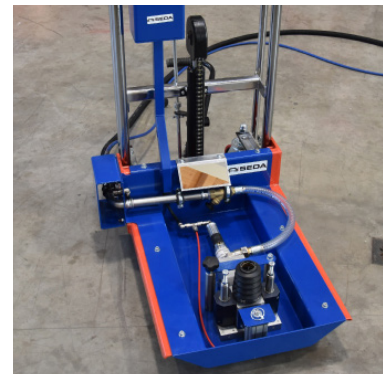

If brake fluid is available, it can be easily removed by the use of brake pipe or hose pliers.

#### More benefits:

- Strong, low maintenance double diaphragm pumps
- EX-certified drilling unit
- Designed specifically for trucks
- Integrated dirt filter
- Simultaneous collection of different liquids
- Fuel quality control
- Industrial Hoses
- High quality production
- Clean & safe
- Compact dimensions

A mirror makes it easier to  
position the drill on the  
vehicle tank

### ORDER INFORMATION

#### A-51072-EDG

SEDA TruckStation ED-G  
Truck depollution system,  
without lifting equipment  
needed.

**A-51072-GP** Set Truck  
SEDA Truck Drilling Machine  
HD including mobile Pump

**Additional device:**  
N-52304 Mobile collecting  
tray 110 l

### TECHNICAL DETAILS

<b>Air pressure:</b>	8,5 bar – 1.100 l/min
<b>Fluids:</b>	Petrol/Diesel Waste oil Hydraulic oil Coolant Washer fluid Brake fluid
<b>Size:</b>	2,2 x 0,5 x 1,8 metre
<b>Space needed:</b>	15 x 4 x 6 m
